TO WHOM IT MAY CONCERN :

During the last six years I have been studying education at the University of Tübingen, West Germany. During this time I have also studied many social movements from the past and present, both their theories, the life styles created from them and their implications in the world of education.

Although much that I discovered both fascinated and inspired me, there were always criticism and doubts and so I continued looking for a model society in which people could live together in harmony.

Finally I found what I was looking for in the books of Bhagwan Shree Rajneesh. For me, his books answered the questions and fulfilled the ideals that have been my main interest for many years. This summer in Rajneeshpuram I have seen the ideals being lived out day by day. I have never before seen so many people live and work together in peace and joy. Never have I seen so many happy, laughing children in one place. Everything happening in Rajneeshpuram is only possible through the presence of Bhagwan Shree Rajneesh. His presence is the reason that this commune has come into being. What is happening in Rajneeshpuram can give the whole world answers to questions that have been asked for Centuries regarding the structure of society, justice, education and personal growth. Because of this I see Bhagwan Shree Rajneesh as one of the most extraordinary spiritual masters in the world today.
