

TO WHOM IT MAY CONCERN

I am studying education at the University of Göttingen in West-Germany and am at present visiting Rajneeshpuram in Oregon.

I had my first experiences with sannyasins and Bhagwan Shree Rajneesh at MEDINA Rajneesh Sannyas Ashram in England. In spite of being sceptical about communes and the living Master Bhagwan Shree Rajneesh in Oregon, I was impressed how peaceful and efficient the 150 members of the commune were living and working together. During my stay at MEDINA I participated in several meditations which were devised by Bhagwan.

I experienced how alive my body became and how my joy for life increased. I then also went to a German sannyas commune and felt Bhagwan's energy moving and changing me. I became a disciple of this religious teacher.

Since then 1/2 year has passed and I'm living together with sannyasins in a commune in Göttingen. We are running a business together as well. The love for our Master has pulled us together and we live in harmony with each other.

In Rajneeshpuram I experienced that Bhagwan inspires his sannyasins through his very presence. They created within a very short period of time a place where there is no violence and no crime.

We are a religious movement that is growing continuously and wants to give an example how one can live together in peace, with technology and in harmony with nature. I have immense trust in Bhagwan, who is an exceptional spiritual teacher and leader. We can create with his help a world where there is much more joy for life than negativity, where people live together lovingly and harmoniously.
