To who it may concern

My profession: president, Director
General of a business selling perfumes, business
woman by excellence, nothing seemed predestined
for me to encounter BHAGWAN Shree Rajguru,
until the day I met one of his disciples, which
brought me via that friend to see more
closely he who could change people who had
approached him to the point of making them
radiate.

Therefore went to Poona the place
where he resided, and when I saw him I
knew that he was an exceptional being -
to the great surprise of my very cartesian mind.

I attended DHARMA and the lectures that
he gave at that time - And I can say that
since I met BHAGWAN it has only been possible for
me to travel and to meet spiritual movements -
Tibetan KARMAPA - a buddhist master and assistant
to the DALAI LAMA - came to spend a week with me -
BHAGWAN by his existence, opened me to spirituality.

I am convinced that BHAGWAN Shree Rajguru
is a contemporary spiritual master - an awakener -
a man of ART and of Science.

And that this an immense opportunity for a country like America - a country so open to the new and who can give so much at all levels - spirituals as well as religious, culturally and also monitorily. By the impact of his presence, even if he is silent.

Now on a visit to Rajneeshpuram I experience surprising things - from this place in the desert a city is springing - People are so radiant here that they inspire you to roll up your sleeves and to forget all social conditions to take part in their task.

I would like Bhagwan to receive the support that is due to him as a Master of the spiritual - religious - scientist an ART.

B.A.L.
