

To whom it may concern:

Before I met Bhagwan Shree Rajneesh, I led a very busy and successful life, successful both financially and professionally. I was the co-owner of an expanding chain of donut and sandwich shops in S.F., with a great future assured. Yet after I began reading Bhagwan's religious books and doing his meditations I found that it all became quite meaningless in relation to what was possible going within. So I left the business, went to India and became a Sannyasin and am now living in Rajneeshpuram.

As a construction worker here, I experience a state of contentment and love that I did not dream possible before I met Bhagwan. Now it is a fact of life here, for myself and many others. And it is because of Bhagwan and his teachings that this is all possible.

His meditations, growth techniques and religious teachings are all far advanced beyond

Anything that is available today. His vision is inspiring a community that is unique in the world with its living practice of social, environmental and spiritual harmony.

Bhagwan is my religious master and it is His teachings that have made possible a rare and beautiful transformation in my life.

Sincerely,

Sw. SAMATEPAN JAMES
