To whom it may concern -

I am a registered occupational therapist working in Oakland in the field of mental health. I have become concerned with the possible deportation of Bhagwan. I am against it and am hoping he may remain in the United States of America. He is a peaceful man without enemies. He has excelled in his career in the arts and sciences. He and his followers are productive peace loving people. His spiritual teachings and meditations have aided a large number of people in overcoming their fears and sadnesses. Please allow Bhagwan to live in America.

Sincerely,

Nancy Redder
