TO WHOM IT MAY CONCERN

I am a writer, a singer and songwriter of good reputation in Britain and Europe and have just done a tour of America with a collection of songs by English-speaking poets. I am also a professional writer contributing essays and features to some of our best publications.

As a student of Oriental philosophy and mysticism, I came across Bhagwan's books, read them and found them most interesting in their synthesis of various doctrines and their application and relevance to present day conditions. I have known many people who have been greatly helped by the books and the personal example of Bhagwan.

Bhagwan is a thinker and philosopher who has tried bringing ancient wisdom to Western modern men and women who would have otherwise had no access to it, or found any practical application in their own lives for it. United States give shelter and asylum to many thousands of people every year. Men like Bhagwan can contribute more than most, by bringing enlightenment and a solution to many present day problems. In a world threatened by totalitarianism and despair, Bhagwan is one of those who can offer a practical remedy to at least a few.

Shusha Guppy.
