To whom may concern

I was born in Japan and educated in Aoyama Gakuin University. I had degree in American and English literature in 1974. After I graduated the university, I started to travel in Europe and Asian countries to learn other cultures. I was interested in widen my view toward life. I came across Bhagwan Shree Rajneesh in 1978 and became Sannyasin.

For me Bhagwan is an extraordinary teacher encouraging me to open up into many experiences that life can provide us to grow. If I would not know him I would have ~~been~~ lived different life which wouldn't give me nourishment and joy that I'm experiencing now. He becomes tremendous help when I feel bad as well as good. His approach toward human consciousness is total and its benefit is great.
