To whom it may concern

I want to use this opportunity to tell you how lucky you are to have a man like Bhagwan Shree Rajneesh as a guest in your country.

I became a sannyasin which means a disciple - or rather a deep lover - of this outstanding man in February 1981 after I had been searching in various directions looking for answers to many questions.

I was still a child when I found Sigmund Freud's theory quite fascinating. And I was one of the few lucky students who got a place at university for medicine right after I finished school. Later on I had the chance to learn in Prof. Dr. Bruker's clinic, where I got a new view about health. I learned to see the human being as a whole, curing the whole rather than one part.

But after being with Bhagwan Shree Rajneesh as one of his disciples I started to see the divine in everybody which made me take care of my clients in a totally different way.

For a few weeks I have been loving staying in Rajmudrasam experiencing a totally new way of living: more loving and caring, more simple, just being myself rather than following my ideas about what everything should be like.

These two years of being with my Master have transformed my life completely. It is just unbelievable that this could happen even within one lifetime.

If every body wanted to open his eyes and see what gift the universe is offering us with this man, nobody would go on looking for paradise after death.

Yours sincerely

Na Anand Surja
