

Ma Anand Vani  
Rajneeshpuram

To whom it may concern.

For 16 years I was employed by German Airlines Lufthansa supervising and training flight crews on international flights. I was getting acquainted with the most interesting and intelligent people of all continents without any impact on my personal life.

During my first brief personal meeting with Bhagwan Shree Rajneesh, I realized that this was the most extraordinary being I had ever met. This found proof in surprising changes that started to happen. Though my outer life stayed the same, I experienced release of tension and pressure that made me more successful in my work. I was handling complicated situations with ease, I became relaxed and more efficient. I started to relate to people in a less superficial and more caring way. All this happened without any verbal communication or direction from Bhagwan's

part. Looking in his eyes, sitting in front of him in silent meditation was more than enough. Even my chronic illness from which I had suffered for ten years disappeared in a few months.

I am now taking part in this great experiment which became possible through the foundation of the Commune of Rajneeshpuram. Through Bhagwan Shree Rajneesh's silent presence I have fallen in harmony with myself, in harmony with 15 thousand people during the Festival in total silence. Rajneesh is triggering explosions of creativity, I have discovered my talent for poetry and painting, and even farming and constructions. Talents I was totally unaware of. What is happening to me is happening to everybody around here - Rajneeshpuram is the astonishing proof.

Through the presence of Bhagwan Shree Rajneesh this outstanding Master, a field of peace and love has happened that is contagious. America must be proud to provide a home for this extraordinary man, mankind is being transformed. How can America not fully support this expression of peace, love and harmony? Yours sincerely  
Pra Anand Varu.
