To whom it may concern!

I've heard that Bhagwan Shree Rajneesh may get some difficulties with an immigration permit in the USA. Therefore the letter.

I've studied paedagogics and finished it. The main subject of these studies is the field of talking with parents and their children about educational problems and solving it, in which I've made some experiences. Just now I continue my studies with a second subject - psychology.

In both fields I got many stimulations from Bhagwan's work. On the one hand there is the mainly empirical orientation of my studying - on the other hand there is the deep and at the same time simple and loving understanding of human nature in Bhagwan's books. Often I got new ideas from these books, new insights which were very refreshing in a way.

Therefore I'm really disappointed when I hear that Bhagwan may get difficulties.

The most important aspect in Bhagwan's books for me seems to be that he has

the ability to accept everything at the first time and
then making suggestions so simple and convincing
that I'm always surprised again.

My English is not good enough to write out more
details but I hope to stress out a bit why I believe
that Bhagwan is an important and refreshing
person in our time.

with the best wishes

Paullosky
