

Amsterdam, 8-4-'88

To whom it may concern,

Ma name is Ma Prem Samarpito, I'm 29 years old and since 2 1/2 years a sannyasin. My job is to be a social worker in a centre for pregnant (confused) women, I'm counseling there. I live in a Rajneeshcommune and that so beautiful in combinat with my job, because in our centre the energy of the Buddha field which is created among us is so strong and positive, that I can handle it really easy to be involved in so many problems at my job, where the clients are confused, mixed up and needing so much love and care.

I can tell you that I feel tired and empty coming back from my work and then "home in the Buddhafield of my commune immediately something changes, because it is so alive here, because it is so positive here". This balance in my life makes things work really good and me really happy.

The ultimate experience for me this year was to visit our beloved Master Bhagwan Shree Rajneesh in Oregon. This place is so beautiful because of the presence of Bhagwan. His love is so overflowing and loving and positive, that it isn't even possible to feel any kind of negativity there. It's like a Disneyland with so many loving and beautiful people. To be in the presence of Bhagwan, every morning in satsang (our

Silent heart to heart communion with our Master goes really deep inside a sudden relaxation and inner peace is happening by itself.

Just because Bhagwan doesn't use any words, just because he sits there and doesn't talk, but so available for us, makes the energy he spreads, just hit me deeply.

How can I express this experience to you?

I hope you can feel a bit of what I'm writing to you. It is something that happened to us and what we like to share together with our beloved friends and relatives.

Because it is something ecstatic, and stimulates us to a positive attitude.

yours sincerely, with love

Ma Prem Samarrito
