TO WHOM IT MAY CONCERN

First I would like to introduce myself: I am a 36 years old woman and at present working as a free lance interpreter. In 1964 I completed my commercial apprenticeship and for some years was working as a secretary. In 1973 I passed my university entrance exam and soon afterwards started my studies at Zurich University which I completed in 1980 as lic. phil. I.

I did my first group with Sannyasins about two years ago. I was determined to make the best of the therapy they offered but otherwise to stay away from these people. I kept this attitude up to last year when I spent some time at the Buddhafeld in Medina, England. There I saw people who had realized one of my ideals, i.e., to live and work together. What touched me most, however, was the love and happiness which these people radiated. I felt that they had found a way in their life which allowed them to live with their hearts. I also felt a special kind of energy, and although I had never seen Bhagwan (and still have not) I began to feel that he was speaking to me through his people. I found answers to many questions in my life and suddenly no longer felt I was going around in circles. So I finally decided to go Bhagwan's way - not because I thought it the only right way but because it is a way with love, and it is the only way with love I have come across.

Yours sincerely,

Kerena Waber
